Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-31 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 are drawn to “a software object coupled to a source processing chains in a media processing filter graph”, classified in class 709, subclass 315.
 - II. Claims 15-21 are drawn to “a user-defined processing project determining whether multiple accesses can be shared by a common processing chain”, classified in class 709, subclass 312.
 - III. Claims 22-31 are drawn to “a media processing system having processing chains to handle non-combinable requests”, classified in class “709”, subclass “104”.

3. The inventions are distinct, each from the other because of the following reasons:
Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking “a user-defined processing project determining whether multiple accesses can be shared by a common processing chain”, particulars. Invention II has separate utility such as lacking “a media processing system having processing chains to handle non-combinable requests”, particulars. See MPEP 806.05(d).

Art Unit: 2154

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the extensive search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Lamce Sandler (509-324-9256) on January 9, 2004 to request an oral election to the above restriction requirement. Lamce Sandler made no election over the phone.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2154
